pdf files are intended only as a guide for operating instructions and should not be construed as an authoritative instruction manual. This is because actual working conditions may vary and are beyond the control of the manufacturer. The accompanying .pdf files are provided for your information only and have not been independently tested or verified. All the differentials used in the MWM Diesel engines are designed and intended to withstand extreme temperatures and high loads. In

---

spite of this, we recommend that you exercise caution when installing and using these differentials. In many cases you can use the procedure shown below to reduce the cost of the differential. Do not make changes without first reading the safety precautions in this manual.

1. Power Takeoff (PTO) ===== When using a PTO, oil is carried to the transmission with the power flow. In this case, the PTO shaft is usually mounted on the outboard side of the transmission case, typically to the right side for a right-hand drive car, as shown in [Fig. 4](#fig\_004){ref-type="fig"} Fig. 4. Mounting position of the PTO shaft.

2. Preventive Maintenance ===== As a preventive maintenance measure, the following instructions are given for regular servicing of the main engine.

1. Remove the distributor cap, with a socket set, and remove the rotor seal.
2. Remove the inspection plugs located in the following positions: - around the two spark plugs - behind the main throttle body - behind the air inlet cover - behind the air cleaner - behind the throttle plate on the low-speed side
3. Remove the oil filter cover.
4. Open the oil filter cover and detach the oil filter.
5. Check the oil level.
6. If the oil level is low, add oil to the oil filter.
7. Reinstall the distributor cap and rotor seal.
8. Reinstall the inspection plugs.
9. Inspect the main engine's wiring harness for damage, and repair if necessary.
10. Oil the camshaft bearings.
11. If the engine is not used for a long period, remove the main engine, replace the main engine's oil, lubricate the joints, and reseal the joints.

Preventive maintenance includes routine 82157476af
